

Exercise File

GitHub repo to fork

<https://github.com/deekshasharma/secure-js-api-jwt>

Instructions:

- You can find the git branch for every module in the README file.
- These branches already have the code ready for you to run. However, I will write some of the code in the demos. If you want to write it along with me, feel free to do so in a separate git branch.
- There is a section for FAQs to help you answer possible questions. Please refer to those when you get stuck.
